EXPERIENCE

FRIDAY, Copenhagen — *Data Scientist & Full-Stack Developer*

March 2018 - Present

Specialized in gathering, processing and analyzing data, specifically from social media. This included tracking customers' advertising campaigns, gathering insights on conversations surrounding a customer, or providing analyses on a customer's social media account in terms of engagement and impressions.

Also specialized in full-stack & web development. Developed a web application for training customers in PR & communication under a simulated crisis. This project required an apt knowledge of APIs, microservices, web/backend frameworks, JS frameworks, databases and containerization.

As one of two programmers in the company, I learned proper cross-disciplinary communication. I also gained experience with direct interaction with customers.

EDUCATION

IT-University of Copenhagen — *BSc in Data Science*

August 2017 - January 2021

Auckland University of Technology — *Certificate of Proficiency In computer science*

July 2020 - November 2020

PROJECTS

Research paper — *Misinformation on Twitter during the Danish National Election*

Analysis of political parties & social media during Danish parliamentary election 2019 in collaboration with Altinget.dk.

Research paper entitled *Misinformation on Twitter during the Danish National Election* presented at Conference for Truth and Trust Online.
